## Good Manufacturing Practices

**SUNYATA PON LEE** products are manufactured as per the Good Manufacturing Practice (GMP) and HACCP rules and standards, following strict sanitary processing standards.

The company is permanently subject to Health Inspection by the Department of Agriculture and is qualified as an exporter as per the establishment registry SIF 2292, issued by DIPOA /BRAZILIAN DEPARTMENT OF AGRICULTURE.

## **PROPOLIS EXTRACTS - PON LEE**

The Pon Lee Propolis extracts are produced with 100% Green Propolis, being selected export quality raw material.

Pon Lee Propolis Extracts are produced with an exclusive maturation of approximately 1 year, this increases the concentration of subtle substances, resulting in a more efficient extract, dense and unique in quality.

Products Available for Pon Lee: Propolis Extract ; Propolis Glycolic Extract ; Bee Pollen and Propolis Glycolic Extract; Propolis and Bee Pollen Extract

## Sunyata Golden:

Sunyata Propolis Extracts are prepared with the best raw materials found in Brazil. Such raw materials are collected in special areas and times and have exclusive characteristics and aroma of remarkable quality.

Sunyata Propolis Extracts undergo a maturation process for approximately one year, thus enhancing their subtle substances, which results in a more effective and thicker extract of unique quality.

Products Available for Sunyata Brand: Propolis Glycolic Extract, Bee Pollen and Propolis Glycolic Extr., Propolis in soft Capsule and Propolis Alcoholic Extract

06 Propolis and Honey Soap

## Propolis

### What is Propolis?

Propolis is a Greek word formed by syllables “pro”, that means defense, and “polis”, that means city, so its definition is “in defense of the city”, in this case, in defense of the beehive.

Propolis is a resin collected by honey bees (*Apis mellifera*) from different parts of the plants, such as sprouts, buds and flowers found in trees, bushes, etc, and it is changed by the saliva of the bees to seal the beehive and protect it against the entry of insects and proliferation of microorganisms.

**Differentials of the Green Propolis:** High concentration of Artepillin-c, Rich in Flavonoids and Phenolic Substances

### WHY PON LEE SUNYATA PROPOLIS EXTRACT IS DIFFERENT?

**NATURAL PRODUCTION:** Products do not undergo industrial or synthesizing processes during manufacture.

**RAW MATERIA:** The Green Propolis is collected in areas that are not proper for for planting and agricultural purposes, so it is free from insecticide contamination.

#### **MATURATION AND MACERATION:**

**Maturation:** Approximately 1 year.

**Natural Maceration:** concentration of 43% to 46% of the raw material.

**EXTRACTS OF TOTAL SOLIDS:** 16% to 29%.

( Maximum percentage achieved in Natural Maceration.)

Pon Lee Brand:

## Propolis Glycolic Extract

Ethyl Alcohol-Free

Product for alcohol intolerant people who need a component easily absorbed in the body.
